ABOUT ME

Product Developer and Full-Stack Web Developer with three years of experience building scalable SaaS platforms and responsive web applications. Skilled in React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, and Supabase, with strong frontend expertise and a product-focused mindset. Experienced across requirements analysis, system architecture, development, deployment, and production support.

WORK EXPERIENCE

PRODUCT DEVELOPER – HAMAD ACADEMY – 01/09/2026 – Current – KUWAIT

Product development and technical delivery across Hamad Academy and affiliated digital ventures. Responsible for requirements analysis, product planning, vendor coordination, QA and release readiness, web and mobile product improvements, Academy website ownership, UX/SEO optimization, operational automation, technical audits, and the definition of workflows, business rules, data models, permissions, and delivery estimates for new digital products.

PRODUCT DEVELOPER – 50STUDIOS – 24/06/2025 – 01/05/2026 – KUWAIT

• Contributed to 6 digital products—BagsNotifier, Claw Game, Masaha, Thailand Store, Khsrny, and Family Tree Builder—and helped launch 4 into production.

• Took primary development ownership of Claw Game, engineering the online flow that enables users to control a physical claw machine remotely.

• Built bilingual Arabic and English product features using React.js, Node.js, Express.js, Supabase, and PostgreSQL, while resolving issues across multiple existing company projects.

• Integrated a third-party AI body-measurement solution into Masaha, allowing customers to capture measurements through a mobile device for custom dishdasha tailoring.

• Implemented 3 core workflows for Khsrny: administration, question-and-answer management, and advertising, while also contributing to BagsNotifier and Family Tree Builder.

.NET MAUI MOBILE DEVELOPER – INDEPENDENT MOBILE PROJECTS – 01/10/2024 – 01/04/2026 – RIYADH, SAUDI ARABIA

• Independently developed the mobile frontend for 2 applications—Wathiq and Platxe—using .NET MAUI, C#, and XAML, and integrated them with .NET Core backend APIs.

• Built Wathiq around 2 primary workflows: managing educational programs and generating reports required by the Saudi Ministry of Education.

• Developed employee analytics and reporting features for Platxe.

• Prepared 3 production store releases: Platxe on Google Play and Wathiq on Google Play and the Apple App Store.

FLUTTER MOBILE DEVELOPER – PANCODE – 01/06/2023 – 01/05/2024 – DAMASCUS, SYRIA

• Developed the mobile frontend for 2 Flutter applications—Sekkara and VLP—using reusable widgets and backend API integration for Android and iOS.

• Led Sekkara's mobile redevelopment, restructuring its user interface and application flows around updated product requirements.

• Built the VLP mobile application for UNDP Syria, enabling lawyers to follow and manage general and earthquake-related legal cases.

• Worked on mobile UI development, state management, reusable components, and production releases.

SKILLS

Frontend Development

React.js | Next.js | TypeScript | JavaScript | HTML5 | CSS3 | Tailwind CSS | shadcn/ui | Responsive Web Design | RTL | Localization

Backend Development

Node.js | Express.js | REST API Development | JWT Authentication | Role-Based Access Control | Prisma ORM

Product Development

Requirements Analysis | Feature Prioritization | Product Roadmaps | Stakeholder Collaboration | End-to-End Product Ownership

Databases

PostgreSQL | Supabase | Firebase | SQLite | Database Design

DevOps & Architecture

System Design | Docker | CI/CD | Git | PM2 | IIS

Mobile Development

.NET MAUI | C# | XAML | MVVM | Flutter | Dart | Capacitor

PROJECTS

20/09/2026 – 03/10/2026
Wissam Dental Clinic | Website & Brand Identity

Designed and developed a professional website for Wissam Dental Clinic, including the complete visual identity, UI/UX design, and frontend implementation.
The project focused on creating a modern, responsive digital presence that reflects the clinic's identity and presents its information clearly to potential patients.
Key Responsibilities:
- Created the clinic's visual identity, including colors, typography, and overall design direction.
- Designed and developed responsive website interfaces for desktop and mobile devices.
- Focused on usability, visual consistency, and a professional user experience.
- Managed the project from initial concept and design to development and deployment.

01/05/2026 – 05/06/2026
Medical Portfolio & Patient Engagement Platform

• Created a bilingual Arabic and English medical portfolio website and administrative dashboard from design research through production launch.

• Delivered 5 modules covering medical services, educational resources, videos, consultation inquiries, and administrative content management.

• Implemented role-based access for 2 user types: Super Admin and Admin.

• Conducted interface research across medical and professional portfolio references to create a patient-friendly design that presents the physician as a trusted specialist rather than a traditional clinic.

• Launched the platform into production, where it is now serving real visitors.

01/05/2026 – 01/07/2026
Warba Smart School Management Platform

• Independently designed, developed, and deployed a bilingual Arabic and English school management platform, owning the frontend, backend, and database architecture.

• Delivered 10+ operational modules covering students, guardians, teachers, subjects, attendance, grades, behavior, health cases, plans, projects, notifications, and administration.

• Architected a dynamic role-based access control system with configurable roles and permissions, Super Admin-controlled administrator creation, and audit logs.

• Modelled complex relationships between teachers, subjects, students, and guardians, including linking one guardian to multiple students and enforcing accurate access rules.

• Launched the platform into production for 700+ students, alongside teachers, guardians, and administrative users.

• Integrated real-time notifications, Gemini-powered reporting with user-triggered regeneration, and PDF and Word exports.

01/10/2025 – 23/06/2026
Media Production Management Platform

• Built and launched a bilingual Arabic and English platform combining a public media website with an internal operations dashboard.

• Delivered 10+ modules covering services, portfolios, photography session inquiries, internal operations, accounting, invoices, and administrative content management.

• Implemented access flows for 3 user types: Super Admin, Admin, and Operations Manager.

• Engineered workflows for handling and serving large volumes of videos and high-resolution images through the production server.

• Built a photography session inquiry workflow that allows prospective customers to submit requests directly through the platform.

• Put the platform into active production use for managing company content and operations while receiving real photography session inquiries.
