PROJECTS

01/10/2025 – CURRENT

Media Production Management Platform – Full Stack Web Application

Developed a full-stack platform for a media production company to manage company services, portfolios, and internal operations. The system includes portfolio management, company information pages, and internal modules for accounting and invoice management.

Built using React for the frontend and a Node.js-based backend architecture with database integration. Designed to support scalable content management and business workflows for media production operations.

25/12/2025 – 05/01/2026

SH Specialized Dental Clinic Website – Frontend Web Application

Built a responsive clinic website using React to present services, doctor information, and contact details. Designed as a lightweight digital presence for the clinic, focusing on performance, clean UI, and mobile responsiveness. Deployed as a static production-ready web application.

01/07/2024 – 01/10/2024

Academic Project 2

Mobile application using AI for tourism and travel companies

Responsible for developing the travel and tourism app using Flutter, integrating AI for enhanced user experience. I designed and implemented bilingual user interfaces (Arabic and English), and worked on booking features, modifications, cancellations, and AI-powered customer support.

Additionally, I was responsible for organizing tasks across projects and coordinating between developers to ensure smooth and efficient workflow.

01/07/2023 – 10/10/2023

Academic Project 1

Mobile and Web Application for School Task Management

Led the development of a Flutter-based mobile app that streamlined task management for students, parents, and teachers. The app enabled real-time tracking of homework, quizzes, and progress, while providing teachers with a dashboard for managing tasks. I integrated APIs to ensure seamless data exchange between the app and backend, utilizing a clean, scalable architecture that enhanced performance and reliability. Additionally, I coordinated with the backend to ensure smooth and efficient implementation of all features.
